Special Issue Information

Dear Colleagues,

Bioengineering has hugely advanced in recent years with the rise of technology, medicine and resources, especially in medical diagnostics, robotics in healthcare, artificial intelligence in medicine, biomaterials, rehabilitation engineering, and assistive technology.

The aim of this Special Issue is to create a community of authors and readers who will discuss the state-of-the-art research and develop new ideas and research directions in biomedical engineering with a special focus on biomechanics, biomaterials, and artificial intelligence. To this end, we invite papers on new trends in biomedical engineering.

Manuscript Submission Information

Manuscripts should be submitted via our Editorial Manager system:

www.editorialmanager.com/ama/default.aspx

Authors should choose article type: Special Issue " New Trends in Biomedical Engineering" from the drop-down menu.

Please visit the [Instructions for Authors](#) before submitting a manuscript.
